## How The Gab Medical Community Helped Me Fight Covid

BY ANDREW TORBA ON NOVEMBER 16, 2021

I've had the China Virus for about a week now. It was only a matter of time and to be frank I'm glad I finally got it so I can build up my natural immunity with the immune system God gave me.

I'm doing very well thanks to the Gab Medical Community. Over the past year we've had tens of thousands of doctors, nurses, and other healthcare professionals join Gab and that has really been a blessing to our community as they've provided a wealth of information that is being censored everywhere else. It has especially been a blessing to me as I came down with the virus.

In particular I'd like to thank [@realdrstella](#) and the Frontline Doctors, which is where I got my Ivermectin and hydroxychloroquine months ago so I was instantly prepared.

I'd also like to thank the fantastic doctors at <https://rhsusa.com/>, a Gab Advertiser and Parallel Healthcare company, who got me some other prescriptions right away. If you or someone you know has Covid set up an appointment and they can help. Most of their doctors are Gabbers and you don't even need to leave your home to talk to a doctor and get a prescription.

I'd also like to give a shout out to [Dr. Zelenko](#), [Dr. Simone Gold](#), [Dr. Joseph Mercola](#), and [Dr. Robert Malone](#) who I have learned a lot from on Gab over the past few months. The information they are sharing about the virus and the vaccines can't be found anywhere else on the internet and is being censored like crazy by the Regime.

## So, how was it?

I strongly suspect I have the Delta or some other stronger variant, but there is no way to know for sure. It has been particularly brutal in regards to extreme fatigue and tiredness.

After I started the Ivermectin all of my other symptoms except the fatigue went away. There is a reason [Ivermectin is a Nobel-prize winning wonder drug](#) and I can certainly testify to it based on my own experience.

Of course the American Regime and their cronies in Big Pharma don't want you to know that because if you did they would lose emergency use authorization for their multi-billion dollar cash cow, but I digress.

Over the past 48 hours I have gotten my strength back and am starting to feel like myself again. My oxygen level is at 97% so I'm doing fine on that end. Praise the Lord that my wife took a test today which came back negative and both of the kids are fine. Pray it stays that way!

I am thankful for the immune system God gave me and I am thankful that I will have natural immunity with no concern about myocarditis and Lord knows what else long term from the Big Pharma mystery goop people are injecting themselves with out of fear or compliance.

## A Spiritual Battle

What I've noticed is that fighting this virus has been a spiritual battle. Far too many Christians have given into the fear crafted by the Enemy instead of heeding the command God gives us over and over again in the Bible to "fear not." I tackled the virus the same way I tackle anything in life: by Fully Relying On God. F.R.O.G.

After two years of watching the non-stop fear porn stream across every media outlet all hours of the day you have to stop and remind yourself that God is in control and fully surrender to Him. Not having cable and removing both Fox News and CNN from your life helps a lot with this, take note Christians.

There is a sort of evil presence you experience while infected with the virus that is difficult to explain, but those who have had it know exactly what I'm talking about. During the most extreme moments of fatigue I prayed over and over again for the angels of the Lord to surround me and for the healing hand of the Holy Spirit to give me rest and comfort. God answered my prayer.

## Keep your body and mind active

It's important that you stay active and keep your mind busy while battling the virus. Yes, I got plenty of rest, but I also made an effort to keep working daily and get outside multiple times a day for fresh air even if only for a few moments at a time. That really helped.

I started reading books that have been sitting on the shelf for months and honestly the downtime was much needed and appreciated. I had a lot of time to reflect and thank God for all the many blessings in my life. I ended up removing coffee from my daily routine for the first time in years, which has been refreshing. I'm eating better and certainly sleeping better than I have in months. There are many things to be thankful for from this experience.

The strangest thing for me was losing my taste and smell. Food is just, well, textured. Salt is still noticeable, almost too noticeable, and for some reason I can still taste the sweetness of raw honey. It's weird.

Hopefully I'll get my senses back soon, but I've read that some people never do. Which would honestly make it really easy to eat extremely healthy forever so I won't complain if that's God's plan for me.

Anyway that's all I have for now, I'll keep you all updated as things progress. Please keep my family and I in prayer.

To God be the Glory,
